

## **Appendix A: Instructions for the study**

In this task, you will see two dolls: Ken (left) and John (right). You will be asked questions about them. Each of the dolls has pictures behind them. Your task is to make judgments about those pictures. For each question, indicate your answer by clicking on the appropriate oval. Below are two examples of what you will see, and how you might answer the questions:

Refer to the picture. Who has a taller friend?

- a. Ken (doll on the left) ✓
- b. John (doll on the right)

Refer to the picture. Who has a darker mug?

- a. Ken (doll on the left)
- b. John (doll on the right) ✓

If you have any questions about the two examples above, please raise your hand and ask the teacher now.

During the task, you will not be able to go back to the previous question or page once you have clicked the red button >> at the bottom of the page.

Please do not click the "BACK" button in your browser at any point during the task.

If you are ready, you may start the task by clicking >> at the bottom of this page.

## Appendix B: Results of subsidiary analysis<sup>1</sup>

### ANOVA

**Table A:** Summary of ANOVA results for count, substance mass and object mass conditions.

	df	F	p
Noun type	1, 21, 271.79	495.63	0.000**
Noun type x Age	1, 21, 271.79	30.94	0.000**
Noun type x Language dominance	1, 21, 271.79	5.55	0.014*

Note. \*p < .05; \*\*p < .001

**Table B:** Summary of ANOVA results for flexible noun conditions.

	df	F	p
Noun type	1, 224	108.81	0.000**
Age	1, 224	3.11	0.079
Noun type x Age	1, 224	22.9	0.000**
Noun type x Language dominance	1, 224	22.58	0.000**

Note. \*\*p < .001
